Quezon City, Philippines

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, Kotlin, Dart, C++, C, PHP

Frontend Technologies and Frameworks: HTML, CSS, Tailwind CSS, Sass, React.js, Next.js, React Native, Flutter

Backend Technologies and Frameworks: Node.js, Express.js, Django, Flask, Socket.IO, Celery, Laravel, LangChain

Cloud Platform and DevOps: AWS, Google Cloud Platform, Firebase, Docker

Database & Caching: MySQL, MongoDB, Postgres, Redis

Version Control & Collaboration: Git, GitHub, Figma

Work Experience

ActionLabs

Full Stack Developer Intern

Nov 2025 – Mar 2026

- Designed and developed a scalable full-stack web application from scratch using PHP (Laravel), React.js, and MySQL, contributing to both frontend architecture and backend API development
- Implemented secure role-based access control (RBAC) with dynamic user schemas and protected CRUD operations to enforce strict authorization logic
- Led Git repository management for frontend and backend codebases, enforcing structured branching strategies and maintaining production-ready code quality
- Developed Python automation tools for database backup, data validation, and structured dataset preparation for intelligent system integration.

Mind You

Web Developer Intern

April 2025 – Nov 2025

- Develop AI-powered features, including image generation using Stable Diffusion, and developed an LLM-based system to automatically categorized support tickets.
- Built a developer/admin dashboard to visualize ticket data and key metrics, enabling better tracking and decision-making
- Contributed to agile sprint tasks via Jira, collaborating with senior developers to deliver production-ready features and resolve bugs.
- Write clean, efficient, and tested code, contributing to the quality and performance of production systems.
- Participate in scrum meetings and code reviews, incorporating feedback from senior developers.

Projects

SAKAY

Figma, Flutter, Node.js, Express.js, MongoDB, Python, Flask, Redis, Docker

- Implemented GPS-powered tracking, ETA predictions, and proximity alerts, reducing average passenger waiting time by 25%.
- Built and deployed a cross-platform mobile app for real-time bus tracking, enhancing commuter experience along the Lingayen–Dagupan route.
- Developed driver-side features to identify high-demand areas and optimize routes, improving fleet efficiency and reducing idle time.

UniLodge

Figma, Flutter, Node.js, Express.js, MongoDB, Python, Flask

- Engineered a dormitory rental and listing platform with advanced filters (location, price, amenities), simplifying property search for students and young professionals.
- Enabled dorm owners to create listings with high-quality media, track bookings, and access analytics on rental performance.
- Implemented booking and messaging system with integrated reviews and ratings, increasing transparency and user trust.

PHINMA Hub

Figma, ReactJS, React Native, Node.js, Express.js, MongoDB

- Developed a cross-platform learning and communication tool for professors and students, streamlining task management and announcements.
- Built instructor and student panels with features like homework tracking, grading, and progress monitoring.
- Implemented notifications, chat rooms, and calendar integration, improving academic engagement and time management.

Education

PHINMA - University of Pangasinan

Bachelor of Science in Information Technology in Systems Development, 2026

PHINMA - University of Pangasinan

High School Diploma, March 2022

Certificates

Best System Development Project

University of Pangasinan, 2025

Harnessing Blockchain to Succeed with the New Normal

Lyceum-Northwestern University, March 2021

CS50's Introduction to Computer Science

Harvard University, June 2023
